Commercial Offer

By creating a site

SumWeb Studio

What do we offer

The VadimDevelop team aims to increase the efficiency of the business of each of our clients. This is how we get customers who stay with us for a long time and come back again and again - because they see the result.

We offer:

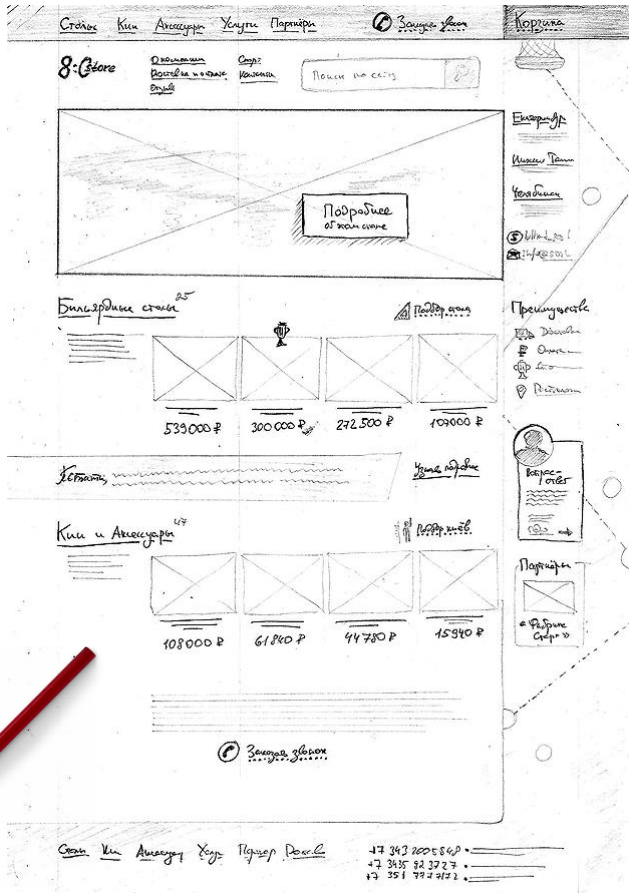
- Comprehensive analysis of the Internet component of your business
- Designing and creating a creative website concept
- ← Design that increases conversion and forms the desired image of the company
- ← Website development using the latest technologies: HTML5, parallax layout and others
- Accurate and complete filling of the site with content, texts for people, not robots
- Promotion using new technologies (LF queries, social networks, behavioral factors)
- Maintenance of the site, your computers and servers.

SumWeb Studio

prototype

At this stage, our task is to think over the structure and logic of the project, describe user behavior scenarios and content of the site pages.

Unlike many studios, we do prototype in the old fashioned way, on paper. Thanks to this, the result is not just a scheme of the future site, but a full-fledged creative sketch with style outlines.



SumWeb Studio

Design

The design of our project with you will be handled by a team of designers, as well as (with necessary) specialized specialists: illustrator, technical designer.

We do not make a beautiful picture out of the site that everyone will like. We make a working tool that will hook your target audience and turn visitors into buyers.

SumWeb Studio

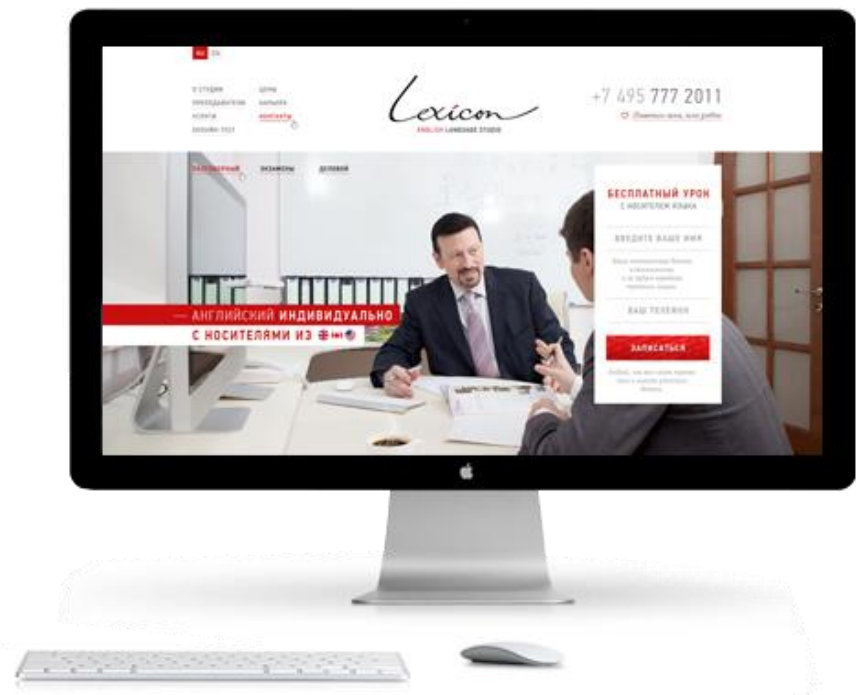
Site development

Depending on the task, we implement your project on ready-made CMS Bitrix, WordPress, Joomla, OpenCart, Yii2, Magento
To make the site dynamic and conveniently displayed on all platforms and devices, we use HTML5 technology.

We create projects of any complexity, from landing pages, business card sites to large government portals.

SumWeb Studio

Portfolio: elite English studio



The website of the elite English language studio "Lexicon" has been created. Among the works - the concept, the creation of site design and style-forming elements, HTML + JS layout, site assembly on Drupal

The design of the main page in the Landing Page format and the design of more than 20 internal pages of the site were developed. Teachers and students took part in a photo session and became part of the studio's website.

Platform: Drupal

SumWeb Studio

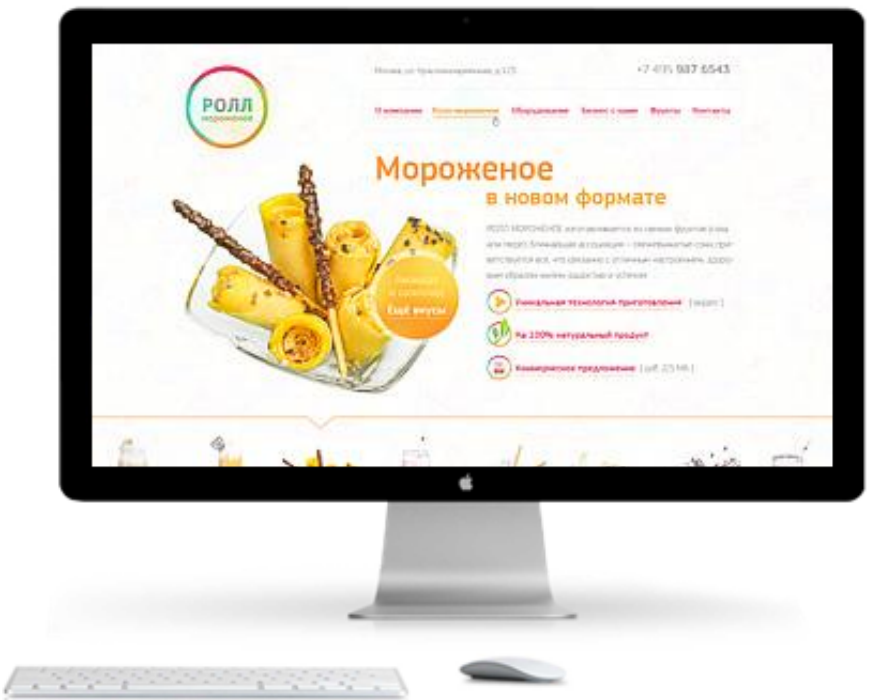
Portfolio: Roll Ice Cream

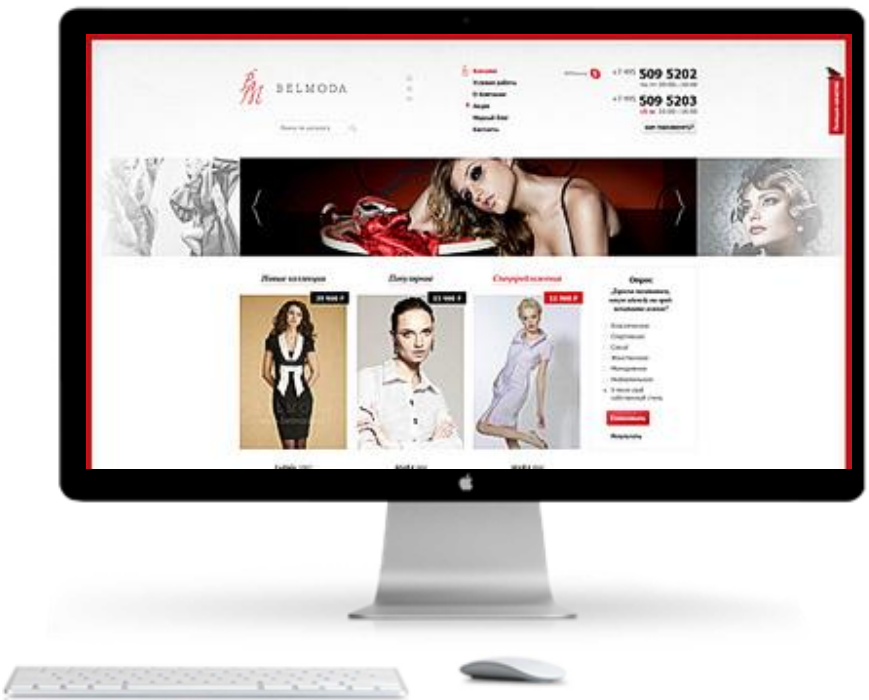


Our team has developed a website for Roll Ice Cream, which is the first to offer a new product on the Russian market.

Fresh and clean design is beneficial demonstrates the attractiveness of roll-ice creams for future customers of the company.

SumWeb Studio

Portfolio: Belarusian clothes

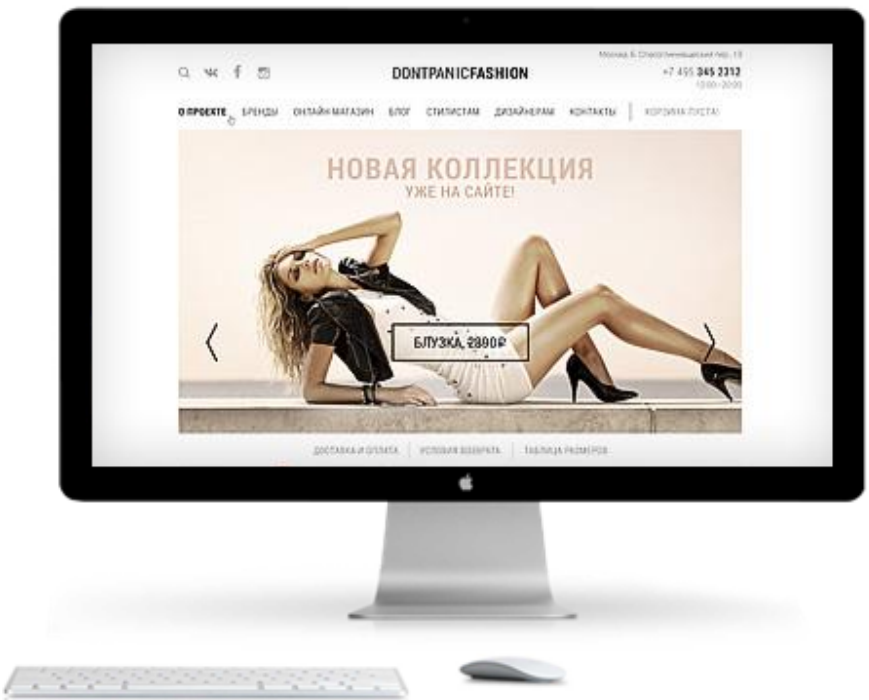


The customer - the company BelModa - positions itself as the most worthy partner for the wholesale supply of Belarusian clothing.

As a result of the work, the visual appearance of the site was updated, the style and solidity of the company were emphasized, and the design of the mobile version of the site was created.

SumWeb Studio

Portfolio: clothing store



We designed, drew and developed a website for an online fashion store.

The uniqueness of the project is that all the presented models are created by Ukrainian designers.

SEO Website Promotion

For promotion, a linking map of all pages of your site is developed, and copywriters write unique, useful and selling texts.
We conduct a detailed analysis of your competitors from the first places of search results and find the strengths of promotion in your topic.

From us you will receive only "white" methods and quality control.
